

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at line 17 on page 10 with the following:

In a further embodiment, an immunogenic capture system is employed. Such systems include an antigenic sequence (and optionally a cleavage site) such as the DYKDDDDK sequence (SEQ. ID. NO. 4) disclosed in Hopp et al (1991) U.S. Patent No. 5,011,912, or Hopp et al (1987) U.S. Patent No. 4,703,004 or the DLYDDDK sequence (SEQ. ID. NO. 5). The immunogenic tag allows the protein to which it is attached to be purified based upon its affinity for an antibody.
